

Trimming Your Cat's Nails

1. Cats have retractile claws so you need to gently squeeze the toe between thumb and forefinger to expose the claw.
2. Most cats have light colored claws, making it easy to see the blood vessels and nerves that supply the claw as a pink stripe at the base of the nail, which is called a quick. You want to cut the claw to within approximately 2 millimeters of the quick.

3. Cut the nail at the angle shown in the picture.
4. We recommend that owners start this at any early age. Trimming the nails and playing with the paws early on can prevent problems when the kitten is full grown.

Note: If your cat is indoor/outdoor it is highly recommended that you **DO NOT** cut their nails. They need those for protection!

Here are some nice [nail clippers](#) & some [“Kwik Stop”](#) (in case you get a nail too short) from [Chewy.com](#)!

Please feel free to call us if you would like a free demonstration on how to properly trim your cat's nails.
