

Trimming Your Dog's Nails

1. If your dog's nails are extremely long, trim just a little off and wait a week and trim the nails again. This causes the blood vessels (vein) to retreat back into the nail and weekly trimmings will allow you to trim your dog's nails shorter.
2. Hold the trimmer as shown in the picture below, with the name plate and screws facing away from you.

3. Cut the nail at the angle shown in the picture.
4. Take off a little at a time until the nail is even with the bottom of the pad.
5. We recommend that owners start this at any early age. Trimming the nails and playing with the paws early on can prevent problems when the pup is full grown.

Here are some nice [nail clippers](#) & some [“Kwik Stop”](#) (in case you get a nail too short) from [Chewy.com](#)!

Please feel free to call us if you would like a free demonstration on how to properly trim your dog's nails.
